

# Partnering for true interoperability success

Title21 looks to iNTERFACEWARE® to deliver best in class software

---

## ABOUT TITLE21 SOFTWARE:

Title21 Software develops intuitive, integrated technology that streamline the core clinical and laboratory processes of regulated entities. Title21's platform enables healthcare organizations to capture, manage, trend, track and report on patient and process data while managing broad operational functions spanning from document management through inventory management.

---

## Challenge:

Title21 wanted to ensure their platform could easily integrate data from any hospital system using any standard.

## Solution:

Title21 partnered with iNTERFACEWARE, using Iguana® as their HL7 integration platform.

## Results:

Title21 continuously ensures customer satisfaction with end-users loving Title21's integration capabilities.

---

Title21 provides document control, processing, training, inventory and quality, workflow management to regulated health care companies. The software company was looking to expand within the healthcare market and quickly realized Health Level-7 (HL7) integration should be an integral component of their platform, a critical factor in providing a complete automation solution.

The original idea was to develop their own integration engine, but once the developers at Title21 came across Iguana, they quickly changed their minds. The ease of use in creating interfaces and the endless capabilities of Iguana made the partnership an obvious choice.

Title 21's interoperability has since become a key differentiator for the organization. Many technology companies tout the configurability of their software; however, only Title21 Health Solutions provides for the ability to change

your processes while still maintaining historical process configurations, all without time consuming and expensive 'back-end coding'.

Not just a key differentiator in existing markets, partnering with iINTERFACEWARE has allowed for the software company to expand into new markets. The ability to integrate using HL7 has helped Title21 expand their customer base to include cancer centers, hospitals and cord blood and tissue labs.

"Title21 Software can deliver a paperless laboratory environment. I am impressed by the powerful integration capabilities of the system and I am very pleased with the impact it will have on the efficiency of our Cord Blood Bank. Not only are we supported in meeting regulatory and accreditation requirements, we are streamlining our operations from start-to-finish." States a very satisfied customer of Title21, Dr. Phillip E. Posch, Ph.D, Laboratory Director at Georgetown/DoD Cord Blood Bank.
