

## Faster, easier integration for healthcare providers.

The most complete integration solution for hospitals and clinics of all sizes and specialties.

Iguana® delivers results that make a difference:

### Save on your integration costs

The faster you integrate, the more time your IT department has to complete more projects with less overhead.

### Improve workflow across your entire organization

Optimize all of your clinical, financial and operational workflow using a single solution.

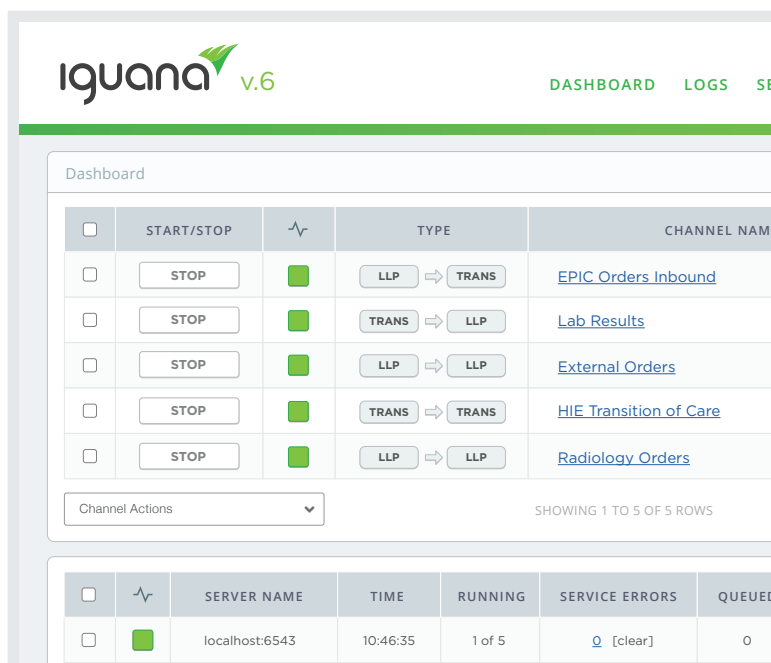

### Take control over your implementations

Claim ownership of your implementation timelines instead of being at the mercy of your vendor's schedule.

### Stay ahead of the game

Be prepared to quickly handle emerging data standards, changing industry regulations and anything else that comes your way.

The screenshot shows the Iguana v.6 dashboard. At the top, there's a navigation bar with 'igwana v.6', 'DASHBOARD', 'LOGS', and 'SETTINGS'. Below this is a 'Dashboard' section containing a table with 5 rows of integration channels. Each row has a checkbox, a 'START/STOP' button, a status indicator (green square), a 'TYPE' column showing data flow (e.g., LLP to TRANS), and a 'CHANNEL NAME' with a link. Below the table is a 'Channel Actions' dropdown and a 'SHOWING 1 TO 5 OF 5 ROWS' indicator. At the bottom, there's another table with 7 columns: checkbox, status indicator, 'SERVER NAME', 'TIME', 'RUNNING', 'SERVICE ERRORS', and 'QUEUE'. The first row shows 'localhost:6543' at '10:46:35' with '1 of 5' running and 0 errors.

	START/STOP		TYPE	CHANNEL NAME
<input type="checkbox"/>	STOP	■	LLP ⇒ TRANS	<a href="#">EPIC Orders Inbound</a>
<input type="checkbox"/>	STOP	■	TRANS ⇒ LLP	<a href="#">Lab Results</a>
<input type="checkbox"/>	STOP	■	LLP ⇒ LLP	<a href="#">External Orders</a>
<input type="checkbox"/>	STOP	■	TRANS ⇒ TRANS	<a href="#">HIE Transition of Care</a>
<input type="checkbox"/>	STOP	■	LLP ⇒ LLP	<a href="#">Radiology Orders</a>

Channel Actions SHOWING 1 TO 5 OF 5 ROWS

		SERVER NAME	TIME	RUNNING	SERVICE ERRORS	QUEUE
<input type="checkbox"/>	■	localhost:6543	10:46:35	1 of 5	<a href="#">0</a> [clear]	0

The Iguana® integration engine is the fastest and most reliable way to create any interface.

## Making integration easy since 1997

At INTERFACEWARE, we know integration. Most importantly, we know how to do it right. We understand that healthcare providers need more than just a great integration engine, they need a complete solution.

Iguana® is backed by dependable support and training, useful open documentation, expert implementation and nearly 20 years of industry knowledge. It's a partnership you can trust.

To learn what faster, easier integration can mean to your provider organization, visit [www.interfaceware.com](http://www.interfaceware.com)

**Everything  
is included.**

#### The superior scripting engine.

**The Translator**, Iguana's unique development environment, lets you build any interface no matter what the source, destination or data format - all within a single screen. Seeing is believing!

#### Take control with public APIs.

Iguana® has a rich set of public APIs to give you even greater control over your interfaces. Access stats to create your own dashboard, create and administer interfaces programmatically or query the logs to trigger external processes.

#### Track your changes.

Built-in source control and GIT support allows you to track, review and revert any change made to your interface logic or environment settings.

## Save time integrating with EMRs, Billing Systems, Health Information Exchanges and any other healthcare systems.

#### Process any data format.

Numerous supported data formats allow you to receive, transform and route any data you want. **HL7 v2, HL7 v3, FHIR, CDA, CCD, X12, NCPDP, DICOM, EDI, XML, JSON, Delimited text, and more.**

#### A single dashboard for all your interfaces.

**The Dashboard**, gives you an overview of all of your interfaces and servers. You can monitor real-time metrics, configure your interfaces and access all of Iguana's major functions.

#### Users and permissions.

Manage users and define roles to control access to specific features, actions and interfaces.

#### Store your data anywhere.

Where you store your data is up to you. Iguana® supports all major databases.

#### Completely web-based.

You can access your dashboard, logs and scripts from any web-enabled device.

#### Connect to any system using any protocol.

A wide number of transfer protocols are supported to ensure you can connect to any system. **LLP, HTTP/HTTPS, FTP/FTPS/SFTP, Web Services (SOAP, RESTful), Database, File system, TCP/IP.**

#### A sophisticated logging system.

Iguana's dependency-free **logs** are more than just a series of records. Instead you get a robust logging application to find and fix errors on the spot, reprocess problematic messages, select what information is logged and much more.

#### High Availability.

Iguana® supports any kind of high availability configuration you wish to use. With no external dependencies, you are free to choose the best method that works for your environment.

#### Alerts and notifications.

Configure email alerts so your team knows exactly when there is a problem with your interface. Use Iguana's out-of-the-box alerts or build any custom alert you want.

**Iguana® has no premium add-ons or paid extensions.**
